

Overview

A teacher is a person whose job is to help people learn. What do teachers do to help us learn? What tools do teachers use? How might computers help teachers?

Web Resources

To learn more about teachers, consider exploring the following Web sites:

- **[NOTE: The localization team must identify and insert the names and addresses of two or three Web sites that feature information about teachers or about how teachers use computers at school. The United States, for example, could use the U.S. Bureau of Labor Statistics (BLS): Teacher Web site at www.bls.gov/k12/help01.htm or the U.S. Department of Education, NCES: Teacher Use of Computer and Internet in Public Schools Web site at <http://nces.ed.gov/surveys/frss/publications/2000090>.]**

What do you want to learn about teachers? Why? Where might you find this information?

Teacher Activities

Now you will use your technology skills to help a teacher discover how computers can help him at work as you complete some of the featured teacher activities:

- **Teacher Activity:** Certificate
- **Teacher Activity:** Grade Book
- **Teacher Activity:** Schedule
- **Teacher Activity:** Newsletter
