Meet the Bears Vocabulary Page

Hibernate: To spend the winter inside a small space in a dormant or resting condition.

Bear: A large furry mammal with a short tail. Bears are omnivorous; they may eat plants, honey, insects, fish, and small mammals. There are several kinds of bears, including black bears, brown bears, grizzly bears, and polar bears.

Habitat: Where an organism lives; the place that is natural for the organism to live and grow.

Carnivore: A mammal that eats meat.
