

How do organisms survive?

by Ms. Richards

The Biomes of the World

What is the Biosphere? What are Biomes?

“No man is an island, entire of itself; every man is a piece of the Continent; a part of the main.” –

John Donne

What are the nine biomes found on Earth?

Tundra 1.	Taiga 2.	Forests 3.
Grasslands 4.	Rainforests 5.	Deserts 6.
Fresh Water 7.	Marine 8.	Estuaries/ Wetlands 9.

Your Research Task

- Define your biome. What distinguishes it from others?
- Where is your biome found on Earth?
- What climatic and geographic factors cause your biome and determine its location?
- Describe life in your biome (plant and animal) and unique mechanisms for survival.
- Cite references.
