

Intel® Teach Program Getting Started Course

Learn technology basics.

This course from the Intel® Teach Program is designed to help K-12 teachers acquire basic technology literacy skills and student-centered approaches. It is ideal for those with little or no computer experience.

Participate fully in 21st century education.

- Acquire technology literacy in word processing, multimedia, spreadsheets, and the Internet.
- Learn teaching approaches that can help your students succeed, including critical thinking and collaboration.
- Find out how to use technology for your lesson planning, classroom presentations, assessment, and more.
- Create your own action plan to help you use productivity tools in your classroom.
