Intel®Teach Thinking with Technology Course

System Requirements

To take advantage of the online thinking tools, the following system configurations and tests are recommended:

Connection Speed
- 56K modem or faster

Screen Resolution
- 800 x 600 screen resolution

Testing the Computers

Test the *Try the Tool* page for the *Visual Ranking Tool* (**www.intel.com/education/visualranking**) on each computer to ensure the required, free plug-ins are installed and working. ***Do not skip this test!***

Macintosh*	Microsoft Windows*
Hardware - PowerPC*-based Macintosh computer for each participant - Apple System Software version OS X* or later - 256MB or more RAM **Browser** - Microsoft Internet Explorer version 8.0 Macintosh Edition* or higher. - Mozilla Firefox* 3.0 or later version **Plug-ins** - The online thinking tools use Macromedia Flash Player 8.0* or higher. The newest version of the Flash Player will install automatically if Flash Player 8.0 or higher is not installed. If for any reason you are not able to load the Flash Player, the tools will attempt to run in Java*. If a plug-in needs to be installed, be sure that you are logged in as an administrator.	**Hardware** - Intel® Pentium® processor 200MHz (performance level or better) or compatible processor for each participant - Microsoft Windows XP* operating system or higher - 256MB RAM or higher **Browser** - Microsoft Internet Explorer 8.0* or later version (Download it at: http://windowsupdate.microsoft.com/) - Mozilla Firefox* 3.0 or later version **Plug-ins** - The online thinking tools use Macromedia Flash Player 8.0 or higher. The newest version of the Flash Player will install automatically if Flash Player 8.0 or higher is not installed. If for any reason you are not able to load the Flash Player, the tools will attempt to run in Java. If a plug-in needs to be installed, be sure that you are logged in as an administrator.

(Continued)

Macintosh*	Microsoft Windows*
Software ▪ Microsoft Word 2004 for Mac* or above ▪ Microsoft Excel 2004 for Mac* or above ▪ Microsoft PowerPoint 2004 for Mac* or above ▪ Adobe Reader 9.0* or above ▪ Archive or file compression software	**Software** ▪ Microsoft Word 2003* or above ▪ Microsoft Excel 2003* or above ▪ Microsoft PowerPoint 2003* or above ▪ Adobe Reader 9.0* or above ▪ Archive or file compression software

Having Trouble Registering at the Intel® Education Web Site?

Are you trying to use a Login ID that is already being used?

The Login ID must be a name that has not been used by anyone who has signed up for any of Intel's services. Try entering your email address as your Login ID on the Registration page. You can change your Login ID at a later time, if desired, by clicking the **Edit Sign In Profile** link on the *Your Projects* page when you are logged in.

Have you registered with Intel before?

If you have registered with another Intel program or newsletter, you may already be registered to use the Intel® Education online tools. If you remember your password from that registration, just enter your email address as your Login ID on the Login page. If you do not remember your password, ask for your password to be mailed to your email address, using the **Recover your Password Now** link in the Instant Help section of the Login page.

Have you forgotten your Login ID?

You can enter your email address as your Login ID on the Login page. After you have signed in, you can retrieve your Login ID by clicking the **Edit Sign In** Profile link on the Your Project page. You can also select the **Recover your Login ID Now** link in the Instant Help section of the Login page to have your Login ID emailed to you.

Have you forgotten your password?

If you have forgotten your password, click the **Recover your Password Now** link in the Instant Help section of the Login page. After you receive your password, either enter your Login ID or enter your email address as your Login ID on the Login page. If you are in a location where you cannot retrieve your email, you may need to register again using a different email address.
