

## Intel® Teach Pre-Service Program

**Intel® Teach** is a worldwide initiative to provide teachers with the skills to effectively integrate technology into existing curriculum to improve student learning. A preservice component of the initiative provides professional development for teacher educators, who are prepared to support classroom teachers in the development of student-centered learning through technology integration and project-based approaches.

### **Pre-Service Faculty Review: Preparing Preservice Teachers for Technology-Enabled Personalized Learning**

- One and a half days (11 hours) of hands-on exploration with free, online tools and resources engaging your preservice teachers in using technology to improve teaching and learning in the K-12 classroom.
- Activities focus on when, where and how to incorporate resources into your course syllabi via online, face-to-face, or hybrid approaches.
- Learn digital skills as you review online resources you can use right away (how to model digital learning, use Google Docs, engage students with online tools, and collaborate via social networking).
- Order curriculum materials for your students AT NO CHARGE!

### **Faculty Review Resources**

Developed by educators for educators, free tools and resources at [www.intel.com/teachers](http://www.intel.com/teachers) support personalized learning through technology enabled, project-based approaches.

- Free online tools and teaching resources support collaborative, student-centered learning
- Exemplary lesson plans, formative assessment strategies, and technology-enriched project ideas for all K-12 subjects
- Online thinking tools where K-12 student teams can engage in robust discussions, analyze complex information, pursue investigations, and solve problems.
