Sethu Meenakshisundaram
Head of Product Architecture and Technology Strategy
SAP

Sethu has more than 25 years of Enterprise System Software Development and management experience. He is currently the head of Product Architecture and Technology Strategy at SAP Labs. Prior to joining SAP in October 2008, Sethu spent a good portion of his career at Sybase Inc. in architecture, development, and management, building world class OLTP and OLAP Database Systems. Sethu was instrumental in developing and leading highly complex clustered systems of Adaptive Server Enterprise and building teams in the U.S., India, and China. Early in the '90s, Sethu developed a version of Sybase Adaptive Server running on the Windows platform. Before joining Sybase, he was with the Microsoft SQL Server BI team driving technology and partner strategy.
