

The new pocket-size Nokia N810 WiMAX Edition. The Internet you're used to, in places you're not.

Brilliant 4.13" Screen QWERTY Keyboard Easy Connections

Key Experiences

Connect to WiFi and WiMAX Wireless networks where available.*

Easy to use, not to mention very good-looking.

Stay connected with friends, with access to Facebook and Skype in the palm of your hand.

The QWERTY keyboard makes instant messaging and emailing a cinch.

2 GBs of memory, expandable to 10GBs (additional memory sold separately) for music, movies, videos and pictures.

Stunning 4.13" widescreen display.

PC media is easily accessed using a USB cable.

* WiFi and WiMAX are network-dependent services and may require subscriptions with a service provider. Network coverage may not be available in all areas. The establishment and continuation of a WiFi or WiMAX connection depends on network availability, service provider support, and signal strength.

** Availability of maps may vary by area-specific sales packages. Coverage of maps may be limited.

*** Voice navigation subscription sold separately.

**** Operating times may vary depending on the radio access technology used, network configuration, device configuration, and device usage.
