## Customer Impact of Change and Recommended Action:

To support the upcoming release of 45nm Intel(R) Xeon(R) Processors and to ease customer transition to this new generation of processors, Intel will be "refreshing" (new product codes and new MM#'s) all its current products based on the Intel(R) 5000 Series MCH.

To support the new processors the entire software stack (BIOS, BMC, FRUSDR) will change. The Closed Loop Thermal Throttling (CLTT) feature

is also being added to all the Refresh Products. Customers are highly recommended to upgrade their SW stack to the latest released versions although the new software will be "backwards compatible" for maintenance and older processor support.

Note: Customers are reminded to place their final orders with Intel for the affected products latest by November 09, 2007. Final delivery of product must also be completed no later than January 11, 2008.
