

# HP Mobile and Security Solutions

Optimize your technology platform, get more reliable solutions and increase the productivity of your company, with the most complete mobile solutions portfolio that only HP can offer you.

The HP solutions portfolio for your mobile technology platform has been developed with the improvement of your company's productivity in mind. HP Notebooks, Tablet PCs, iPAQs, printers, mobile projectors and the variety of accessories will facilitate the work of your production force, your sales staff, your executives on business trips, and will provide you with space saving costs in your facilities.

HP mobile solutions guarantee productivity without sacrificing the availability and security of your information, employee connectivity, or the comfort and complete functionality of a desktop PC.

Optimize your business with complete mobility and connectivity.

HP mobile solutions offer you:

#### Security

With HP ProtectTools and your HP Business Notebook, information is secure.

Executives may:

- Encrypt information on the hard drive.
- Send protected e-mails.
- Control user access.

#### Connectivity

Employees and executives are kept productive both in and out of the office; they can connect for work, give a presentation and print documents easily from anywhere.

#### Replacement for desktop PCs

- When connecting a notebook in the office, the same benefits are gained as with a desktop computer.
- Any conference room or physical space will become an office, having all of the advantages of a PC.

#### Automation of the production force

- The work of IT engineers and operators becomes more productive.
- The sales force will take up to date information to the customer.
- Executives may gather accurate, complete and timely information directly in the field.

## New notebook families for businesses

PERFORMANCE

**nc8200 series**  
The performance of a workstation with all of the mobility of a notebook

- 15.4-inch TFT WUXGA Wide-Viewing Angle
- Intel Pentium M Processor
- MultiBay
- Aprox. 2.6 kg

THIN AND LIGHT

**nc6100 series**  
A smart balance between mobility and an affordable price

- Thin and light
- Display size 15-inch
- Intel Pentium M Processor
- MultiBay
- Aprox. 2.6 kg

**nc6200 series**  
A smart balance between mobile productivity mobility and technology

- Thin and light
- Display size 14.1-inch
- Intel Pentium M Processor
- MultiBay
- Aprox. 2.1 kg

ULTRA MOBILITY

**tc4200 series**  
It lets you do more when you're out of the office

- Lightweight highly-mobile design
- 12.1-inch XGA display
- Intel Pentium M Processor
- Outstanding battery performance
- Aprox. 1.8 kg

Same accessories / Same design features

## HP Business Notebook Family

HP Tablet TC4200

For those users who want to have it all when on the road, without carrying more weight than needed in their briefcase.

- Intel® Centrino™ Mobile Technology, Intel® Pentium® M 750 Processor (1.86GHz, 2MB L2 cache, 533MHz FSB)
- Microsoft® Windows® XP Professional
- 512MB DDR II 400MHz (1 x 512); expandable up to 2048MB (2 x 1024MB)
- Tablet PC Edition
- 802.11b/g wireless connectivity
- 56K high-speed modem, network card, 10/100/1000 network card and wireless module
- Port Replicator with Multiple-Bay HP Advanced Docking Station

HP Compaq NC4200

Perfect for professionals who are looking for excellent performance and like to travel "light".

Weighing only 1.59 kg, the HP Compaq NC4200 allows you to achieve greater productivity in the office or on the road, taking advantage of the various connectivity options.

- Intel® Pentium® M 755 2GHz Processor and 2MB cache
- Microsoft® Windows® XP Professional
- 802.11 a/b/g IRDA and Bluetooth wireless connectivity
- Compatibility of accessories
- High level of security

HP Compaq NC6200

For those users who want to have it all when on the road, without carrying more weight than needed in their briefcase.

The HP Compaq NC 6200 laptop weighing 2.27 kg is the HP notebook that has won the most prizes in the industry.

- Best Notebook ever (MobilePC-February 2004)
- BestBuy (LAPTOP mobile solutions for business and life-June 2004)
- Editor's Choice (PC Magazine June/July/August 2004)
- Intel® Pentium® M 755 2GHz Processors and 2MB cache
- Microsoft® Windows® XP Professional

- Up to 2048MB of memory
- Hard drive up to 80GB and 5400 rpm
- Integrated multiple-bay options for storage and optical devices
- More than 5 hours of stand-alone battery time and up to over 10 hours with an additional battery

HP Compaq NX6110

For professionals looking for affordable equipment and excellent performance, or simply want to replace their desktop PC due to their mobility needs, and still want to have it all on hand.

- Intel® Celeron® M 360 Processor (1.4GHz)
- Microsoft® Windows® XP Professional
- 1MB of cache
- Up to 2048 MB of RAM
- Hard drives up to 80GB
- 802.11b or 802.11 b/g wireless connectivity
- 15" TFT XGA screen
- User-programmable buttons
- Touchpad with on/off button and scrolling window for greater ease of use

HP Compaq NX6120

For users looking for excellent performance, portability and autonomy at a low cost.

A new member of the corporate laptop family that brings the Intel® Centrino® advantages at a low cost.

- Intel® Centrino® Mobile Technology
- Intel® Pentium® M 730 (1.6 GHz Processors and 2MB cache)
- Microsoft® Windows® XP Professional
- Up to 2048 MB of RAM
- Hard drive up to 80GB
- 802.11b/g wireless connectivity
- 15" TFT XGA screen
- User-programmable buttons
- Touchpad with on/off button and scrolling windows for greater ease of use
- 6-in-1 card reader (SD, MMC, Memory Stick, MSPva, xD)
- HP Protect Tools

HP Compaq NX6125

It is a smart mobile office for professionals who require affordable price solutions.

This is a smart mobile office for professionals who require affordable price solutions.

- Intel® Centrino™ Mobile Technology
- Intel® Pentium® M 730 (1.6 GHz Processors and 1MB cache)
- Microsoft® Windows® XP Professional
- Up to 512 MB of RAM
- Hard drive up to 60 GB
- 802.11b/g wireless connectivity
- 15" TFT XGA screen
- User-programmable buttons
- Touchpad with on/off button and scrolling windows for greater ease of use
- 6-in-1 card reader (SD, MMC, Memory Stick, MSPva, xD)
- HP Protect Tools

HP Compaq NW8200

They are carefully designed to integrate security, ease of use and reliability into a mobile, practical and essential office for business.

Carefully designed to integrate security, ease of use and reliability into an essential and practical mobile office for business.

- Intel® Centrino™ Mobile Technology
- Intel® Pentium® M 760 Processors (2 GHz, 2 MB cache)
- Microsoft® Windows® XP Professional

- Touchpad mouse and pointstick
- 6-in-1 card reader (SD, MMC, Memory Stick, MSPva, xD)
- HP Protect Tools

HP recommends Microsoft® Windows® XP Professional.

### Selection guide according to your needs:

If you need:	The recommended equipment is:
Centrino	All equipment except the NX6125
Ultra-portable	HP Compaq NC4200
Thin and Light	HP Compaq NC6230 HP Compaq NX6120
Desktop replacement	HP Compaq NC6230 HP Compaq NW8200
Mobile workstation	HP Compaq NW8200

## HP professional innovation

### Easy to use

- Easy and comfortable to use and carry, thin and light with docking options to achieve desktop functionality "with just one click"
- Uninterrupted operation, leader in the industry, with an optional HP travel battery lasting up to 11 hours; the environmental light sensor optimizes the glare of the screen and the life of the battery (in some models)
- HP docking solutions compatible between platforms, HP travel battery, flexible accessories and shared use of resources
- HP Lifecycle Management solutions reduce the number of images that must be managed and their complexity
- Reduced total cost of ownership (TCO) with simple, industry leading implementation and management tools for each product life cycle

### Reliability

- HP Mobile Data Protection System protects the hard drive from bumps and vibrations, reducing the risk of damage to data.
- HP Local Recovery Solution from Altiris allows rapid data recovery
- High quality professional design, magnesium casing and HP Panel Protection System, which protect against scuffing and scratching, with a keyboard covered with Mylar film that offers greater spill protection
- Exhaustive hardware and software testing guarantees its quality and reliability from the moment it is supplied
- Image stability and lasting product life reduce the use of IT resources, as well as failures and periods of inactivity

### Security

- DriveLock incorporates protected hard drives with hardware that prevents theft and unauthorized access to critical data
- HP Client Manager activates memory change alerts to detect unauthorized local or remote changes (tc, nc and nw models)
- Comfortable and highly secure biometric fingerprint sensor (HP Compaq nx6125)
- HP Protect Tools provides a portfolio of software applications that allow companies to create mobile security solutions to protect the device, data and the network connection

#### HP Protect Tools Security Manager

- Authentication of multiple factors and single system access
- HP Protect Tools Credential Manager

- Easier access to the functions of BIOS security and configuration
- BIOS configuration for HP Protect Tools

- Pre-start and Authentication of Windows Smart Card
- Smart Card Security for HP Protect Tools

- Hardware-based security
- Protects data and credentials
- Integrated security for HP Protect Tools

## Mobility and flexibility

HP works hard to achieve uniformity in its entire Notebook and Tablet PC line, so you can freely exchange docking stations and accessories. In this way, you will get greater flexibility and value from your IT investment. A wide range of accessories adapts notebooks to every need, lifestyle and working environment.

### Vertical monitor base

- Eliminates the need for a second monitor
- Adjusts easily to the eye level

### Add-ons

- Memory add-ons
- Bases for Multiple Device Compartments
- Add-on optical devices and hard drives for Multiple Device Compartments

### Peripherals

- Large keyboard
- Large optical or travel mouse

### Travel with style

- Protection while you travel
- Quality nylon or leather backpacks
- Specific backpacks for Tablet PCs; for use in hospitals, factories and field services

### Desktop solutions

- Effortless one-click docking to enjoy the functions of a desktop computer quickly and simply
- Complete port replicator with additional ports and slots
- Eliminate the buildup of wiring

### Security

- Incorporated HP/Kensington locking solution
- Integrated Smart Card solutions

### Power solutions

- Double duration HP travel battery
- Extended life and additional batteries
- AC/DC power solution for the car, plane or office

## Security Solutions

Ideal for protecting your mobile equipment, even in public places.

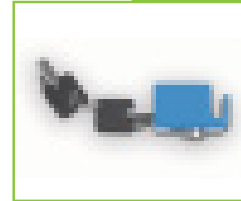

### Chassis Clamp Lock:

Physically secures the top to the chassis, and at the same time securing the keyboard and mouse cables. Available with or without cable. Master key available.

### Rear Port Controller:

Fits the back of the PC, securing the devices and preventing them from being removed or added.

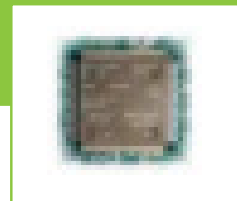

### Kensington Lock:

Designed to fit into a standard Kensington security slot.

Product lines compatible with HP Security Solutions

### Wallmount Security Sleeve:

Allows PCs to be mounted on a wall or under the desk to improve the security and appearance on the desk.

### Security Chip:

Protect security codes and data with TPM.

### Solenoid Lock:

It is added to your PC and acts to protect the chassis from being opened (software-controlled).

### Smartcard:

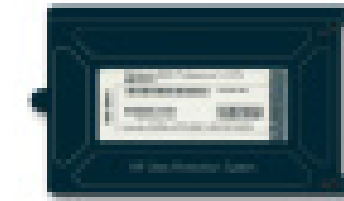

Technology to prevent unauthorized PC and network access.

## HP mobile data protection system

Protect your vital information

### Components

HP Mobile Data Protection System (patent pending).

### Features

The HP Mobile Data Protection System protects the hard drive against impacts, vibrations and reduces the risk of data corruption.

- The mechanical mounting solution minimizes impacts and vibrations on the hard drive to prevent data corruption during normal use.
- The notebook will go into standby mode when the top is closed, ensuring that the hard drive remains still and secure before the notebook is carried to another location.

Recover data and quickly get back to work when files are accidentally deleted or the operating system is corrupted.

### Benefit to the customer

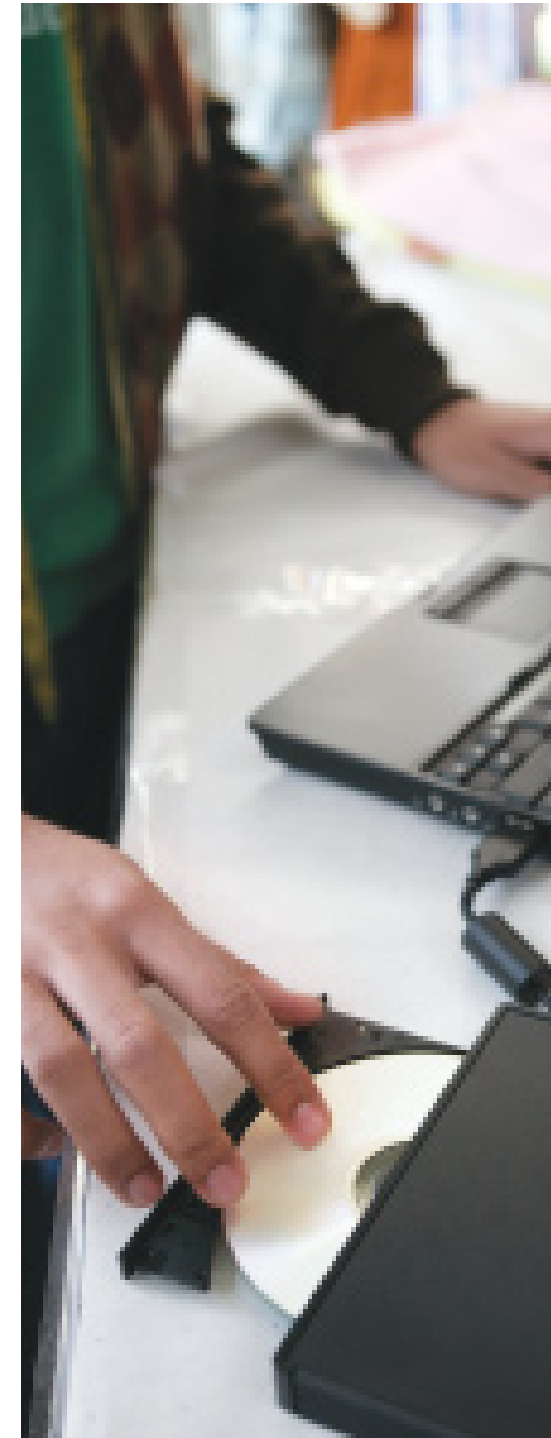

Data is better protected during normal mobile use that may cause hard drive failures.

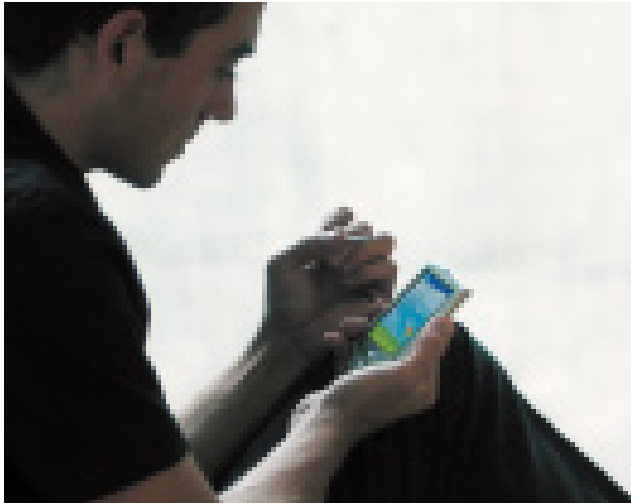

Without buying additional software, the Local Recovery Solution helps to prevent the loss of data due its corruption.

It offers manual or automatic backups for your ease and convenience, helping to reduce downtime due to the loss of information.

Component

## The HP iPAQ Pocket PCs offer you the needed connectivity and mobility to optimize your business.

**Ease of use:** The HP iPAQ Pocket PCs include a new user interface and Microsoft® Windows® software so that you can work with the same programs that you use on your PC.

**More options to stay connected:** With upgrade packages and iPAQ accessories, you can connect to the Internet<sup>(1)</sup> through serial, USB, infrared, Bluetooth®, 56K modem and Bluetooth® cellular connections.

**Work productively wherever you go:** You can read your e-mail, even messages with Word and Excel attachments, webpage links, images and invitations to meetings when you are out of the office. The Pocket program versions of Microsoft® are included, such as Outlook, Word, Excel and Internet Explorer for Pocket PC.

(1) An account with an Internet access service provider is required. Sold separately.

The HP iPAQ Pocket PCs use Windows® Mobile™ software.

HP iPAQ 2110

**Maximum mobile productivity with e-mail, calendar and contact lists.**

Maximum mobile productivity with e-mail, calendar and contact lists.

- Intel® PXA270 312MHz Processor
- Microsoft® Windows® Mobile™ 2003 Second Edition for Pocket PC
- 128MB total memory (64MB of ROM and 64MB of RAM)
- Bluetooth® wireless connectivity
- Includes two slots. Integrated Compact Flash type II (CF) and Digital Security (SDIO)

Includes the new HP Protect Tools security program.

HP iPAQ 2410

**Excellent connectivity and productivity with wireless access options.**

Excellent connectivity and productivity with wireless access options.

- Intel® PXA270 520MHz Processor
- Microsoft® Windows® Mobile™ 2003 Second Edition for Pocket PC
- 128MB total memory (64MB of ROM and 64MB of RAM)
- Wi-Fi (802.11b) and Bluetooth® wireless connectivity
- Includes two slots. Integrated Compact Flash type II (CF) and Digital Security (SDIO)

Includes the new HP Protect Tools security program.

HP iPAQ 2750

**Maximum mobile productivity with e-mail, calendar and contact lists.**

Maximum mobile productivity with e-mail, calendar and contact lists.

- Intel® PXA270 624MHz Processor
- Microsoft® Windows® Mobile™ 2003 Second Edition for Pocket PC
- 256MB total memory (128MB of ROM and 128MB of RAM)
- Bluetooth® wireless connectivity
- Wi-Fi (802.11b) Bluetooth® wireless technology, integrated biometric fingerprint reader
- Includes two slots. Integrated Compact Flash type II (CF) and Digital Security (SDIO)

Includes the new HP Protect Tools security program

HP iPAQ 4700

**Ideal for professionals who require integrated wireless functions, greater security and a double expansion slot for greater productivity.**

Ideal for professionals who require integrated wireless functions, greater security and a double expansion slot for greater productivity.

- Intel® PXA270 624MHz Processor
- Microsoft® Windows® Mobile™ 2003 Second Edition for Pocket PC, Premium Edition
- 192MB total memory (64MB of ROM and 128MB of RAM)
- 802.11b and Bluetooth® wireless connectivity
- Integrated Wi-Fi (802.11b) and Bluetooth® wireless connectivity
- Includes two slots. Integrated Compact Flash type II (CF) and Digital Security (SDIO)

Unique, with integrated touchpad and cursor mouse that makes navigating easier and more fun

## Accessories for the HP iPAQ

CRADLES

Durable case

SD Camera

Foldable keyboard

Synchronization cable

Earphones

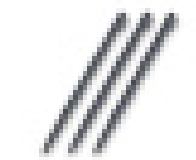

Batteries

Memory

Pencils

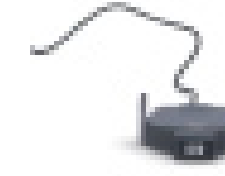

Converter

Leather case

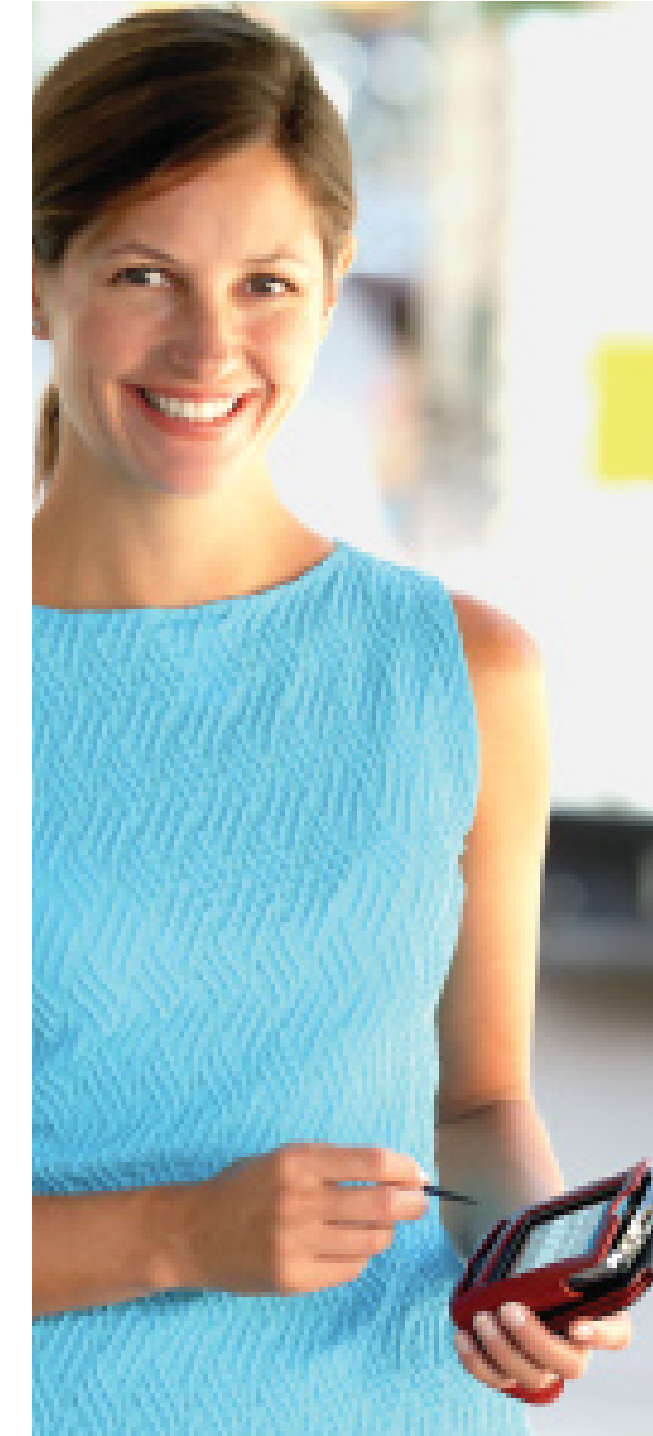

Car adapter

Nylon case

Power adapter

## Portable Projectors

Ideal for salespeople, executives, trainers and presenters who do the majority of their work out of the office.

HP mp3130 Digital Projector

**Small, light, competitive image quality, portable.**

- 1,000-lumen light intensity
- 1,800:1 contrast ratio
- SVGA resolution (800 x 600)
- Roof, tripod and table installation
- Remote control with mouse and laser pointer function
- Digital zoom
- Compatible with NTSC/PAL/SECAM video system
- Protective case
- DPL™ technology system (Digital Light Protection) from Texas Instruments
- 1.0 kg, 14.1 x 20.0 x 5.8 cm
- 2-year warranty

HP sb21 Digital Projector

**Light vertical design, great image quality, ideal for the mobile professional.**

- Slot for CompactFlash/SD/MMC memory cards (optional with SAM system)
- Project clear and crisp images every time: XGA and VGA resolution with scalability to SXVGA
- Gamma color correction with calibrated adjustments, depending on the light spectrum of the digital projector lamp
- Correct lighting intensity. Contrast ratio of 1,800:1 and 1,700-lumen light intensity
- DPL™ technology (Digital Light Protection) from Texas Instruments, industry leader, which eliminates washed out colors
- Automatic image correction system, which eliminates the need to make adjustments at the last minute or half-way through a presentation
- Remote control with mouse function
- 1.5 kg
- 3-year warranty

## Mobile Printer

Print in the office or on the road.

HP Deskjet 460cbi

**Designed for professionals always on the move, who need to print high quality documents in different places, from a laptop, PDA or mobile phone.**

- Includes a lithium ion battery
- 9 ppm in black and 8 ppm in color
- 4.800 x 1.200 dpi
- Feed tray capacity: 45 sheets
- Monthly printing cycle: 500 pages
- 16 MB, 4 MB ROM memory

Connectivity: Parallel/USB Port, infrared (FIR), slot for CompactFlash type I and II cards, Bluetooth® and network connection with HP jetDirect (HP jetDirect optional)

## Financing

HP Financial Services offers leasing and IT solutions for HP customers, making the process for buying, managing and removing IT solutions as simple as possible. Our solutions are highly customized, flexible and have been designed to meet the customer's requirements and overcome their business challenges.

### Main Benefits

#### Tax Adjustments

An initial capital outlay that could run out your existing lines of credit is not necessary; renting or leasing serve as an additional credit resource. In addition, it allows you to develop a technology renewal strategy based upon your needs and cash flow, with very low fixed monthly payments.

There are also possible accounting and tax benefits, given that leasing results in your equipment and systems costs being an expense item vs. an asset.

#### Pay according to your needs

Making payments according to your situation provides you with greater budget flexibility. Leasing improves your cash flow. Purchase the newest technology and get greater benefits from your IT budget – it can even be the financing for your entire solution!

Your lease can include equipment costs, software and soft costs, as well as systems solutions that don't pertain to HP.

#### Protection against obsolescence

Upgrade your technology quickly and simply; choose a lease term that will allow you to work by using the latest in technology to make your business more competitive and reduce the risk of technology obsolescence. Unlike typical financing leases, this lease reduces your monthly payments, due to the fact that the lessor assumes part of the equipment value as a residual.

## HP Care Pack

Good for your company, better for your budget.

Day by day, portable equipment is becoming more important in the today's business environment. Users cannot miss out on the unique combination of power, flexibility and comfort that this equipment offers. This new performance requires better support services that guarantee users greater levels of protection and availability.

The HP Care Pack service offers the best solutions for extending and improving the warranty on your HP mobile equipment.

Through a single point of contact for requesting technical support and assistance, you will have the support of an HP specialist to resolve your problems with the highest level of quality.

Hardware and Software Installation: this service includes preparing a pre-installation plan, unpacking the equipment, assembling it with its options and configuration test, installing the operating system, configuring the software products, connecting the equipment to the network and configuring a printer to the system.

### HP Care Pack Services

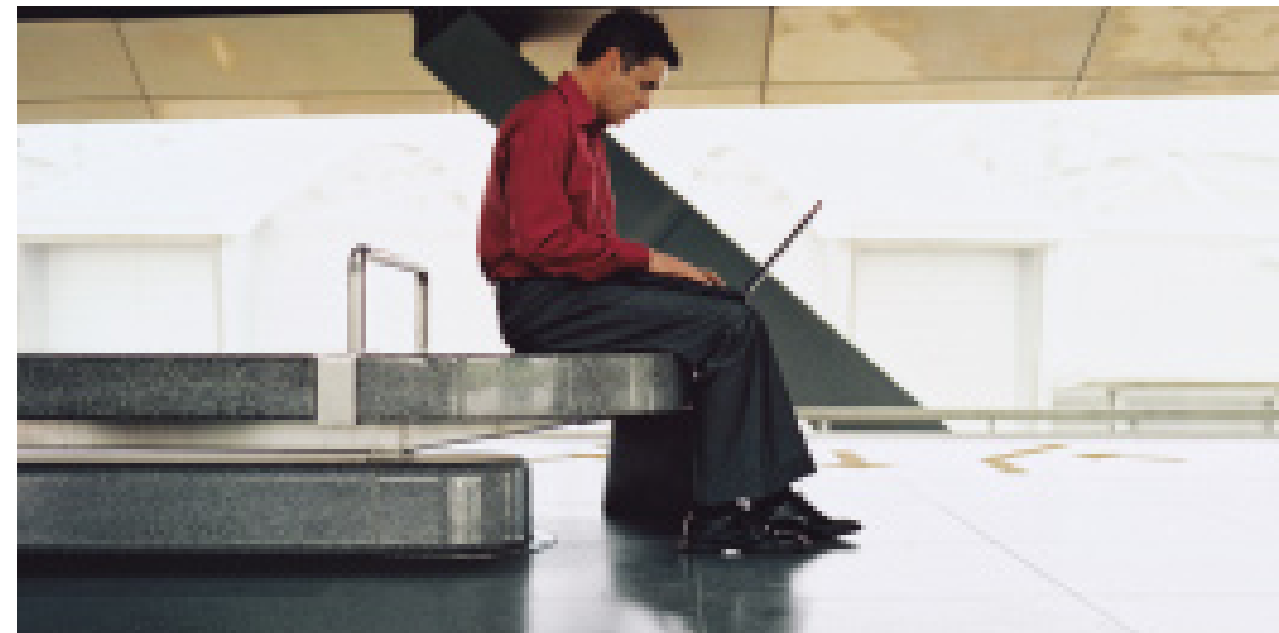

Return to a Service Center: with just one call, we will indicate the Authorized Service Center closest to your location.

Extending the standard warranty: this service allows you to have warranty coverage up to 36 months (only for nx6110 and nx6120 models).

HW 9x5x4 Support the service is provided at your location from Monday to Friday, with a maximum response time of 4 hours, after receiving your call. The service schedule is from 8:00 a.m. to 5:00 p.m.

HP Care Pack services for equipment solutions offer you:

- Greater stability and availability of your equipment.
- The exact level of service you need to actively manage your equipment.
- A single point of contact for requesting technical support and assistance.
- Support from an HP specialist to resolve your problems with the highest level of quality.
- Better management of your equipment, as you increase the productivity of your end users.
- Access to genuine HP parts.
- Reduced cost and complexity of equipment management.

### Mobile solutions

HP has the answer with new mobile technologies and solutions, innovative and intuitive devices that work to remove obstacles between the users and the information they need to be more productive and be more profitable. HP combines the strength of these products with a wide range of services and strategic alliances to offer customers a complete mobile solution.

HP offers you mobile solutions to access your company network, providing your company from:

- Network infrastructure: solutions that allow you to connect your HP mobile equipment regardless of your geographic location (i.e. in-house, building to building, Internet).
- Value services converge all voice, data and video services into your iPAQ through a wireless communication.
- VPNs: use your HP mobile equipment to enter your company network securely and enjoy all available services from your network.
- Management Services for your network: which include from security, network performance, availability, to service quality.

## Why is the security of your information so important?

Thousands of people forget mobile phones and laptops when traveling by taxi.

estimated 11,300 laptops, 31,400 handheld devices and 200,000 mobile phones were forgotten in taxis around the world in the last six months, as shown by a survey.

The survey, conducted on 1,000 taxi drivers from five cities around the world, stated that the loss of handheld devices had tripled in the last half of 2004 as compared to 2001, when the survey was first conducted by the Pointsec software security company.

The majority of the objects were returned to their owners, according to the taxi drivers.

Four out of every five mobile phones and 19 out of every 20 computers were returned, they added.

Londoners appear to be the most careless with their portable devices, while the Danes tend to forget their mobile phones more, according to the survey. In Chicago, passengers would often forget their handheld computers in the back seat.

The survey findings
