

SmartStart Scripting Toolkit 2.0

Support Matrix

The SmartStart Scripting Toolkit provides the ability to build an automated, unattended server deployment solution for high-volume server deployment.

IMPORTANT: The SmartStart Scripting Toolkit practices align with SmartStart releases. The Toolkit version 1.8 and later are optimized for SmartStart 6.0 and later, while versions 1.7 and earlier align to the releases for the SmartStart 5.x family. For additional information, refer to www.hp.com/servers/ss toolkit.

Operating System Support

The SmartStart Scripting Toolkit supports the following operating systems:

- Microsoft® Windows NT® 4.0
- Microsoft Windows® 2000 Server
- Microsoft Windows 2000 Advanced Server
- Novell NetWare 5.1
- Novell NetWare 6
- Red Hat Linux Advanced Server 2.1
- Red Hat Linux 7.3
- Red Hat Linux 8.0 Professional

IMPORTANT: Updates to the Linux files (init.rd) may be required to support various servers and server options.

Hardware Support

The following tables display the HP hardware that is supported by the SmartStart Scripting Toolkit. While all of the Toolkit utilities, except for the Configuration Replication (CONREP) utility, should run on all unsupported servers, the utilities have been tested only on the servers listed in Table 1, Table 2, and Table 3, and the server options listed in Table 4.

NOTE: The Integrated ATA RAID Replication Utility (HYPERCFG) only supports the embedded AMI ATA RAID controller in the HP ProLiant ML310, ML330 G2, and DL320 G2 servers.
