Compaq Rack Solutions

800 x 900 Rack

Wide-profile design provides exceptional cable management and easy access to rack-mounted products.

In today's high-density data centers, cable management can be a challenge. The Compaq 800 x 900 (9842) wide-profile rack helps you make the best use of your floor space, while giving you the cabling room you need. It measures 800mm/31.3" wide – giving you almost four inches of room for cabling on each side – with interchangeable front and rear doors for expanded cabling options.

The 800 x 900 easily couples with the standard-width 42U (9142) rack, so you can customize your solution to fit your specific needs and space requirements. It can be configured as a switching rack or server/storage rack for a unified look.

The 800 x 900 is flexible – fully capable of accommodating a full range of legacy 9000 Series rack options – including PDUs, fan kits, UPSs, and the new Compaq 1U Integrated Keyboard and Monitor, as well as a variety of third-party equipment. And it's built to last, with reinforced mounting rails that are solid enough to support the heaviest servers and storage solutions.

As part of the innovative, cost-effective Compaq Intelligent Rack Management system, the 800 x 900 maximizes data center density, improves manageability and enables you to create a data center that works for your needs.
