1U Keyboard Drawer Features

With the introduction of the new 1U Keyboard Drawer, customers gain space-saving benefits in an innovative and comfortable rack mountable unit. The 1U Keyboard Drawer houses and protects the Internal Keyboard with Trackball utilizing only half the U space of any competitive drawer and symbolizes a trend in rack mounted products (servers, storage, UPS and other rack options) that are especially designed to effectively utilize available rack cabinet space. This keyboard drawer is professionally styled, inexpensive, and designed to complement the TFT450R flat panel monitor (The TFT450R offers an exceptional 14.5″ display, featuring wide angle viewing technology in a 2U form factor that allows the monitor to be neatly tucked away when not in use).

Additional space-saving benefits can be achieved because the Compaq Keyboard/Monitor/Mouse Switch Box (KMM) will mount behind the keyboard drawer and save another 1U of rack space. The KMM switch box can switch a single keyboard, monitor and mouse among four (4-port model) or eight (8-port models) ProLiant servers. All of the Compaq rack options have features that provide convenience and investment protection. 1U Keyboard Drawer benefits include:

- Exceptional arm and wrist comfort due to the ergonomic design
- Space saving 1U form factor
- Compatible design with the popular the 2U flat panel rackmountable monitor (TFT450R)
- Exceptional cable management for reduced clutter
