

Benefits At A Glance

- Simple and Effective. With Compaq, you get the best hardware/software combinations for your requirements. We also make Web-based solutions easy to deploy and manage.
- Protect Your Investments. This standards-based solution means easy integration with your existing environment while keeping resources to a minimum.
- Scalable and Flexible. Whether your needs are large or small, we provide exactly what you need for your Web environment. And as your business grows, your systems will easily expand to support it.
- Confidence. You can expect nothing less than reliable, high-performance technology with maximum availability. Compaq Web-based solutions are pre-tested and proven, so you can quickly attain prosperity on the Internet.

FEEL CONFIDENT: CHOOSE A LEADER

- The Compaq ProLiant Web Server was named the top pick in the "High Performance Server" category by *PC Computing* (March 1998).
- Compaq is the world's leading provider of standards-based Internet and intranet servers shipped in 1997.
- Compaq is the world's leading provider of Windows NT servers.
- Compaq is the world's leading provider of desktops and industry-standard workstations.
- Compaq is the world's #1 vendor in multi-user storage.

It seems everybody's getting on the Web these days — and for good reason. But not everyone needs the same things from their website. Some businesses want a simple, reliable way to reach a new audience. Others need to run advanced databases and demanding Web applications. All those possibilities can make choosing a Web server confusing. Fortunately there's one simple solution — Compaq ProLiant Web Servers.

Compaq ProLiant Web Servers eliminate the guesswork in setting up, managing and getting the most out of your website. Quick and easy to deploy, they incorporate standards-based Compaq hardware with industry leading Web software products from Microsoft — all tested and proven to perform together beautifully.

Sometimes Simpler is Smarter

Launching a website doesn't have to be painful or risky. Setting up and managing your website is a breeze with Compaq ProLiant Web Servers — so you can get out on the Web with complete confidence. Microsoft® Site Server® provides an easy-to-use environment for deploying, managing and enhancing your sites on Microsoft Windows NT Server® and Internet Information Server® (IIS). And built-in management tools from Compaq help turn that manageability into higher uptime for your website. Compaq Insight Manager (CIM) monitors your servers and notifies your administrators of potential hardware failures — before they cause downtime and disappoint customers. The CIM Integrated Remote Console provides out-of-band

management capabilities like remote console and remote reset, so whatever state your network operating system is in, you can diagnose and correct problems quickly. And for ultimate peace of mind, the unique Compaq Pre-Failure Warranty provides replacement of many key server components before they fail.

The result? You'll set up fast. You'll operate with confidence. And you'll stay up and running for your customers and visitors.

It Pays to Keep Your Options Open

Because they're based on industry standards, Compaq ProLiant Web Servers can be seamlessly integrated into your legacy environments and with standard databases like Microsoft SQL Server®.

COMPAQ

Compaq ProLiant Web Servers

Together, Compaq and Microsoft offer standards-based technology to protect your current and future investments while keeping your costs low.

A Flexible Solution That's Always a Good Fit

Whether you are a small business, large enterprise, or Internet Service Provider, Compaq ProLiant Web Servers are always the smart choice. We've designed them to meet a broad spectrum of needs efficiently and effectively. Because they're so manageable and trouble-free, Compaq ProLiant Web Servers are ideal solutions for departmental or remote locations. And because they're powerful and reliable, they're also right for mission-critical Internet or intranet sites and for ISP Web hosting. These solutions have been tested and proven to enable easy, convenient setup and reliable performance of all system elements — hardware, operating system and software. Whatever your online goals, Compaq ProLiant Web Servers give you the reliability, availability and manageability you've come to expect from the world's leading server vendor.

Our Service and Support Fits Comfortably

With Compaq's multi-faceted, flexible support structure, you can choose a customized, cost-effective service program that will protect and enhance your Compaq investment for years to come. Compaq Services provides a wide range of service offerings including:

- A three-year limited warranty fully supported by a world-wide network of resellers and service providers
- Lifetime toll-free 24x7 hardware technical phone support
- Pre-failure warranty coverage of hard drives, memory and Pentium Pro and Pentium II processors
- Worldwide availability
